

TRAFFIC ALERT

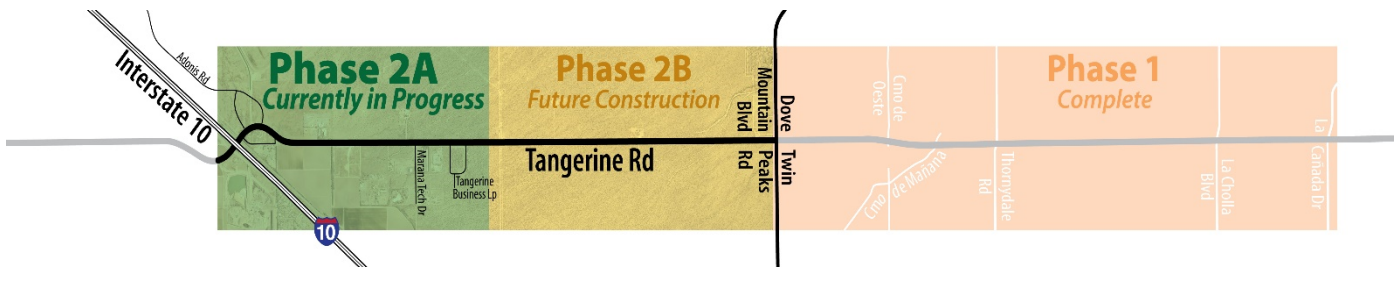

TANGERINE ROAD IMPROVEMENTS Dove Mountain Blvd to Interstate 10 Phase 2A Advance Utility Work

July 1, 2024

The week of July 8, 2024, Borderland Construction will begin construction of the joint utility trench – a trench where the electric and communications utilities will be installed – along the south side of Tangerine Road within the limits of **phase 2A** (see map below).

Work will generally be outside of roadway travel, however, there may be short intermittent shifts in traffic when the contractor installs utilities across the roadway.

Visit www.Tangerinroad.info for project information or to sign up to receive electronic construction information, You can also visit the Town of Marana project Dashboard site at <https://shorturl.at/SwqOP>

For your safety and that of the contractor's personnel, please comply with traffic control devices, flagging personnel, and/or detour signs.

Travel time through the project area may increase during construction so please adjust your schedule accordingly. Construction may restrict traffic lanes and create congestion. Taking alternate routes is suggested.

If inclement weather or other events cause delays, the work may be rescheduled without further notice.
